9-Jul 31-Jul \$0.0100 100%

**MFF Capital Investments Limited (MFF)** entered 2020 advising shareholders to be cautious against expecting high future market returns. Market and economic risks had risen, as had 'very significant geo-political issues'. The LIC paid a fully-franked 20cps special dividend in February, before reassuring investors that it was "not under pressure to either act or to do nothing". After having minimal buying activity in the second half of 2019 (\$33.5m purchases of investments), MFF continued to slowly reduce the opportunistic/tactical exposures in the portfolio. An unrestrictive mandate coupled with a high level of patience has seen the net cash weighting as a percentage of investment assets and net cash rise from 2.2% on 31 December 2019 to 46.4% at the end of May.

With a key focus on capital preservation and balance sheet strength, MFF doesn't need to rush back into the market if the opportunities aren't there. Flexibility in this market is key. With approximately \$750m of cash in the portfolio, MFF is well positioned. This is after paying ~\$90m in tax instalments resulting from profitable realisations of investments this calendar year. Tax payments will decrease the LIC's NTA. They will also result in the ability to pass through franking credits by way of fully-franked dividends. At the end of May we estimate that MFF had a ~\$100m franking credit balance. A substantial increase from the FY17 \$1.3m reserve. The Board currently aims to distribute half-yearly fully-franked dividends of 2.5cps each. This provides investors with a net and gross yield of 1.8% and 2.5%, respectively, on the last close price.

SOURCE: MFF CAPITAL INVESTMENTS LIMITED, IRESS

MFF has recently added to the portfolio, with 4 LIC/LITs appearing in the top holdings in the Company's Monthly NTA Report. These are **Magellan Global Trust (MGG)**, **PM Capital Global Opportunities Fund Limited (PGF)**, **Platinum Capital Limited (PMC) & Magellan High Conviction Trust (MHH)**. Each LIC/LIT position represents less than 0.1% of the portfolio. At the end of May, PGF traded at a 21% discount to the pre-tax NTA. The share price is currently ~30% below the YTD high. In addition to being able to enter into highly reputable global mandated LIC/LITs at a discount to the NTA/NAV, the underlying portfolios of MGG and MHH share similar traits to that of MFF. Which is of little surprise due to the Magellan connection. This allows MFF to marginally gain further exposure some of the top holdings. Individual investments comprising the investment portfolio will not exceed 10% at cost (or higher amount authorised by the board).

MFF and MGG were featured in the March 2020 Quarterly LIC/LIT Report as 'Top Investment Picks'.

#### Regal strengthens on QuadPay merger

**Regal Investment Fund (RF1)** has furthered its recovery with **Zip Co Limited (Z1P)** announcing an agreement to acquire 100% of unlisted US buy-now pay-later company Quadpay. QuadPay is the largest investment in the Regal Emerging Companies Fund III and consequently a large position for RF1. The Emerging Companies strategy was the second largest exposure in RF1 at the end of April with 27%. This is at the upper end of the expected exposure range for this strategy. RF1's estimated NAV on Monday 1 June 2020 was \$2.69, a 6.3% increase from the previous day. This figure was estimated with Z1P trading at \$3.75. It closed the week at \$5.64, up a further 50%. The NAV as at 5 June was \$2.85, with RF1 trading at a 13.3% discount. RF1's \$2.58 trading high of the week is a 105% increase from the low experienced in March 2020.

RF1 aims to deliver attractive risk adjusted absolute returns over a period of more than 5 years with limited correlation to equity markets, diversified across geography, sector and strategy.

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LICs underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA<sup>^</sup> and adjusted discount<sup>^</sup>, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.

"The Indicative Pre-Tax NTA has been adjusted for the full dilution (100% exercise) of any options outstanding and dividends. Dividends are removed from the NTA once the security goes ex-date and until the receipt of the new ex-dividend NTA. \* The Indicative NTA is the actual reported weekly pre-tax NTA as we have been unable to calculate the Indicative NTA within a reasonable level of accuracy. # The Indicative NTA is the actual reported monthly pre-tax NTA as we have been unable to calculate the Indicative NTA within a reasonable level of accuracy. \* The Indicative NTA is the actual reported monthly pre-tax NTA as we have been unable to calculate the Indicative NTA within a reasonable level of accuracy. + Prem/Disc does not adjust for the dilution of unexercised options.

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LICs underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA<sup>^</sup> and adjusted discount<sup>^</sup>, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.

"The Indicative Pre-Tax NTA has been adjusted for the full dilution (100% exercise) of any options outstanding and dividends. Dividends are removed from the NTA once the security goes ex-date and until the receipt of the new ex-dividend NTA. \* The Indicative NTA is the actual reported weekly pre-tax NTA as we have been unable to calculate the Indicative NTA within a reasonable level of accuracy. # The Indicative NTA is the actual reported monthly pre-tax NTA as we have been unable to calculate the Indicative NTA within a reasonable level of accuracy. \* The Indicative NTA is the actual reported monthly pre-tax NTA as we have been unable to calculate the Indicative NTA within a reasonable level of accuracy. + Prem/Disc does not adjust for the dilution of unexercised options.

We have enclosed a reference page for dividends. We have used historical dividend data for the dividend information, and manager guidance where appropriate. Please note that historical dividends are no guarantee of future dividends to be paid.

\*LTM Dividend is the total dividends paid over the last 12 months, excluding Special Dividends paid. # Franking assumes a tax rate of 30%, actual company take rate applied may differ

We have enclosed a reference page for dividends. We have used historical dividend data for the dividend information, and manager guidance where appropriate. Please note that historical dividends are no guarantee of future dividends to be paid.

\*LTM Dividend is the total dividends paid over the last 12 months, excluding Special Dividends paid. # Franking assumes a tax rate of 30%, actual company take rate applied may differ.

Measurement of the LIC performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking.

The effective impact on the share price if the premium or discount were to normalise to the historical averages. The Bell Potter's Indicative NTA is not without error, and to be used as a guide only. As such we have included the average error (average monthly NTA less indicative NTA), average absolute error (average monthly NTA less indicative NTA), and the range of minimum and maximum errors.

\* Refers to the current share price divided by the indicative pre-tax NTA as compared to the average 6m, 1y, 3y and 5y Discount/Premium share price to pre-tax NTA as at end of the previous month, over the relevant time period of 1, 3, 5 and 10 years. + Refers to the current share price divided by the indicative pre-tax NTA as compared to the average 6m, 1y, 3y and 5y Discount/Premium share price to pre-tax NTA as at end of the previous month, over the relevant time period of 1, 3, 5 and 10 years.

The effective impact on the share price if the premium or discount were to normalise to the historical averages. The Bell Potter's Indicative NTA is not without error, and to be used as a guide only. As such we have included the average error (average monthly NTA less indicative NTA), average absolute error (average monthly NTA less indicative NTA), and the range of minimum and maximum errors.

Options outstanding and Shares on Issue are as at the date of the report.

A number of LICs under our coverage currently have options outstanding. Options dilute the NTA when exercised and therefore have an impact on the Premium or Discount on a look through basis.
