August performance

August saw further strong gains across global equity markets. We also observed the arithmetic average share price to pre-tax NTA discount narrow from 11.2% to 8.8%. On a market-cap weighted average basis this was even tighter, shrinking from 3.7% to 2.9% month on month.

Figures 1 and 2 depict the relative 1 year pre-tax NTA performance and average dislocation for peers across similar investment mandates. While it's noted that premiums and discounts do not necessarily nullify in the long-term, this tendency may provide insight into superior returns and management for a given point of entry. Generally speaking we would expect there to be a positive correlation between performance and premiums, indicating strong demand and forward sentiment. In this regard **Thorney Technologies Ltd (TEK)** is a noticeable outlier.

ACQ capital raising

This week **Acom Capital Investment Fund Limited (ACQ)** announced a 1:4 non-renounceable rights issue at \$1.10 per share, with the record date being 22 September 2020. ACQ currently has 53.6m ordinary shares on issue and a market capitalisation of \$66.5m (based on 18 Sep closing price of \$1.24). This presents a potential capital raising of \$14.7m. Historically the fund has exhibited stellar NAV growth and shareholder accretion, delivering investors with a total 1 year return of 16.1% and 21.6% respectively. ACQ has an attractive mandate for retail clients, providing direct access to institutional and wholesale placements for listed and unlisted microcaps. The fund has been able to effectively deploy capital and generate strong excess market returns based on these identified mispricings. The capital raising should provide for further investment opportunities while increasing scale and relevance.

BELL POTTER

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LICs underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA[^] and adjusted discount[^], which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.

Options outstanding and Shares on Issue are as at the date of the report.

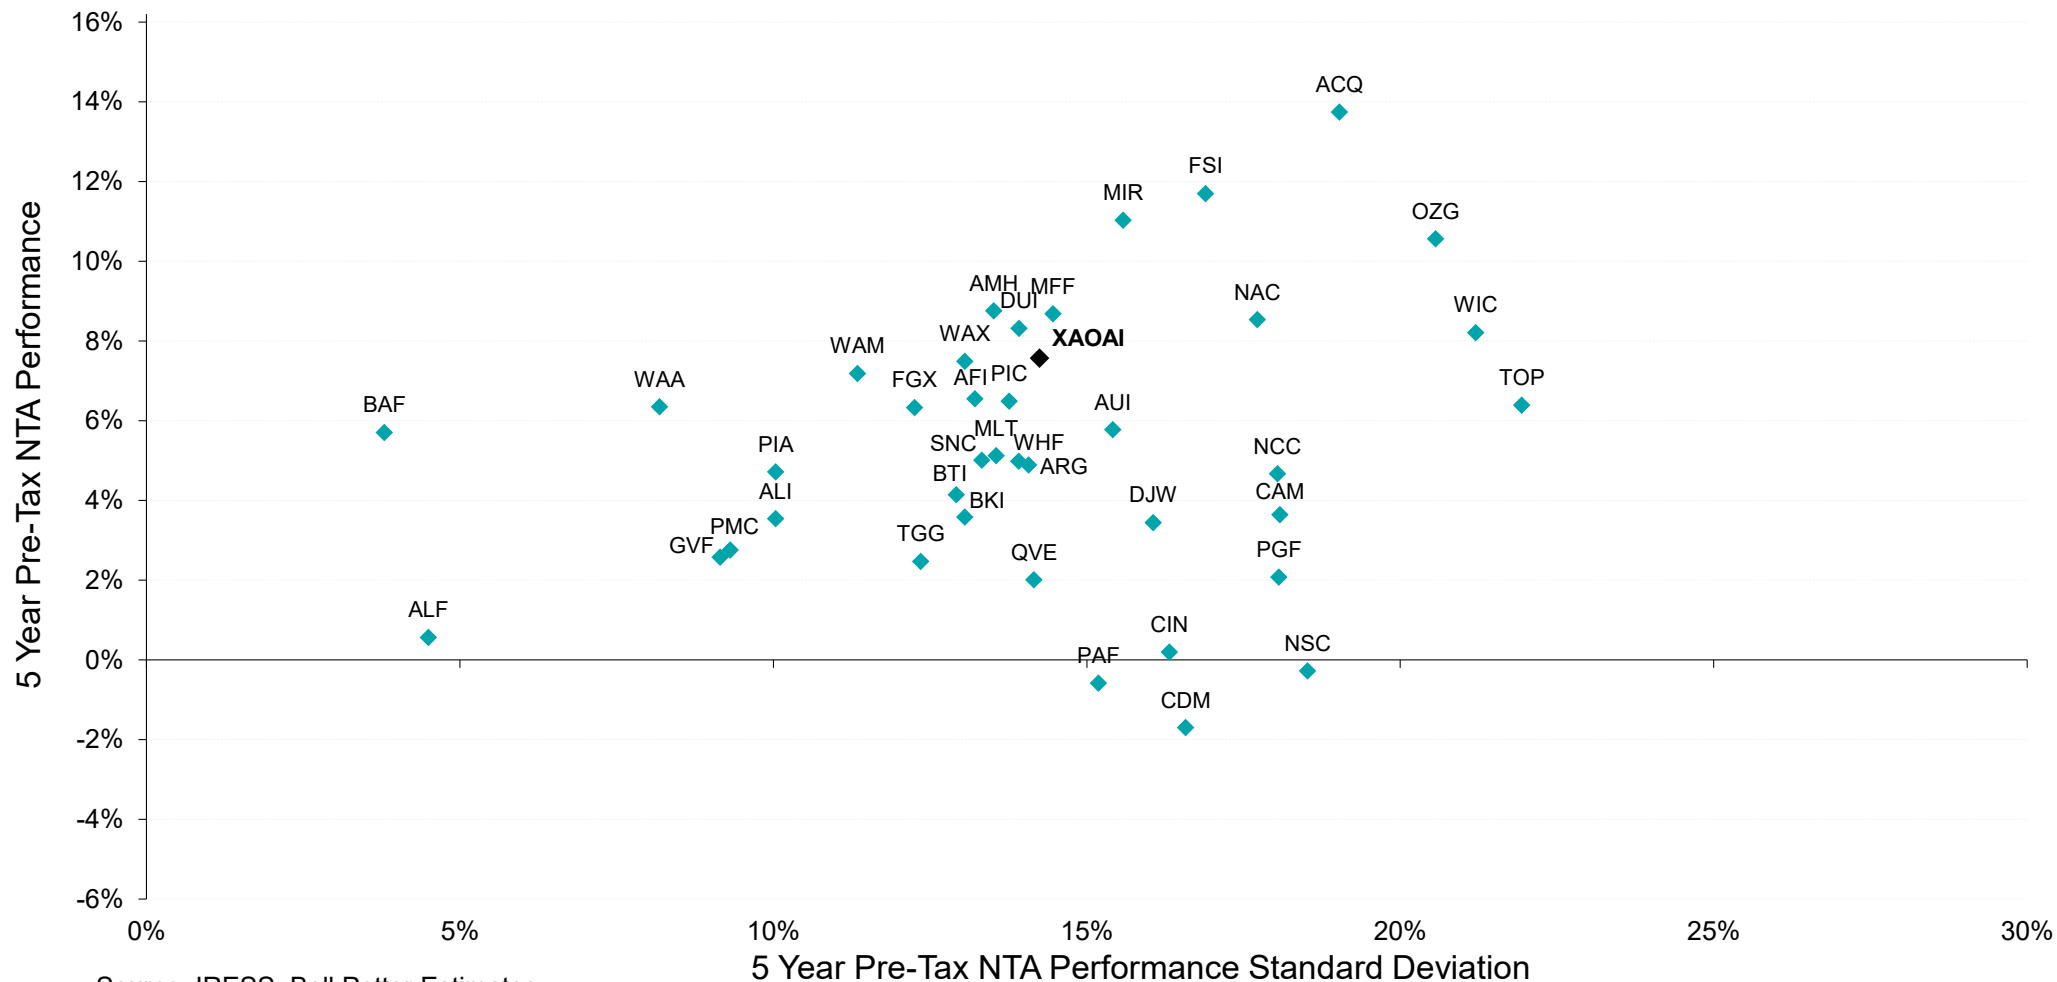

Chart 1: 3 Year Pre-Tax Performance v Standard Deviation

Source: IRESS, Bell Potter Estimates

Measurement of a LIC's performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking.

Chart 2: 5 Year Pre-Tax Performance v Standard Deviation

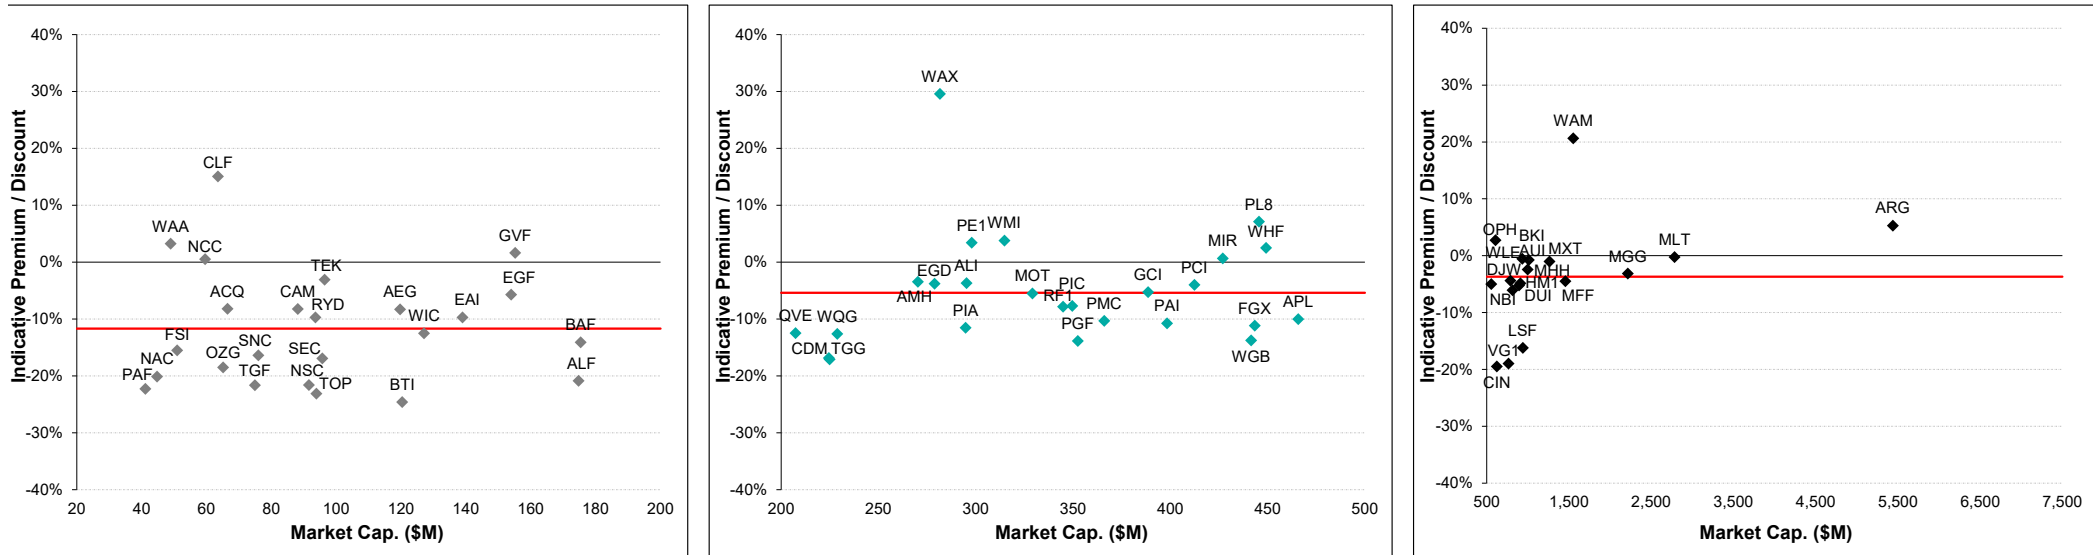

Source: IRESS, Bell Potter Estimates

Measurement of a LIC's performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking.

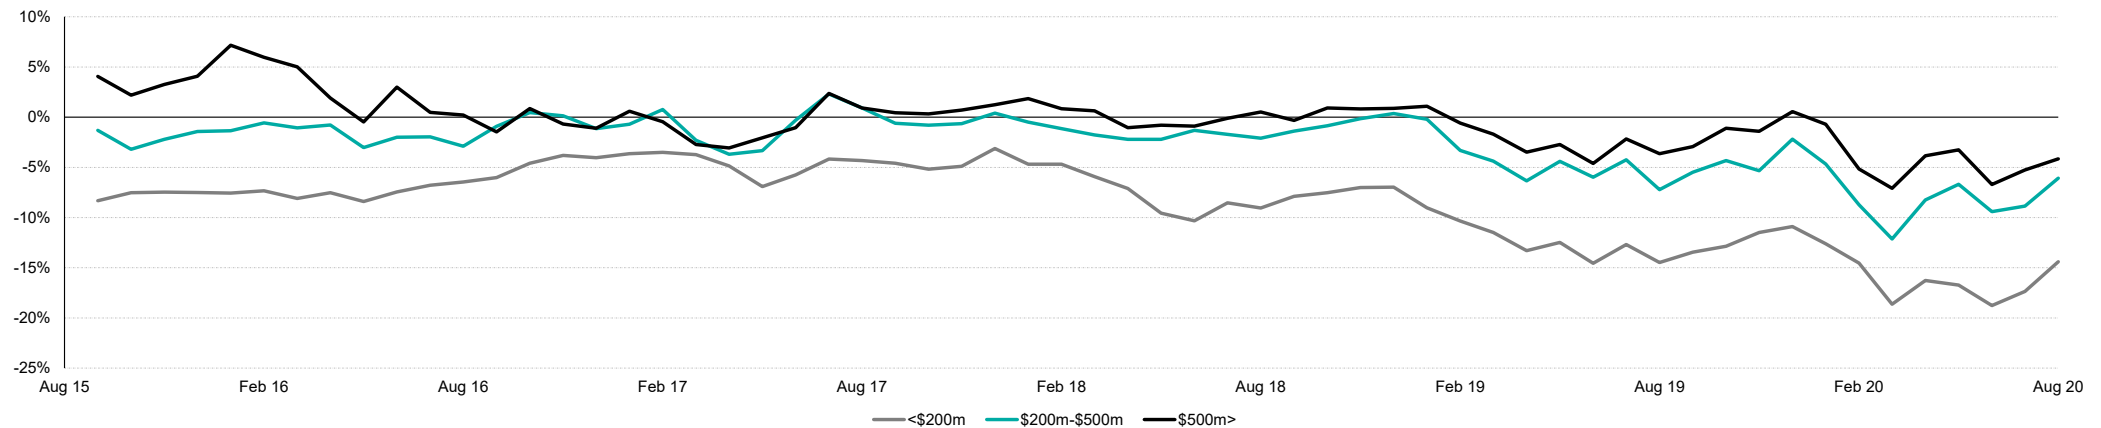

Chart 3: Premium/Discount Relationship Across Market Cap (Equal-Weighted Average Indicated by Red Line)

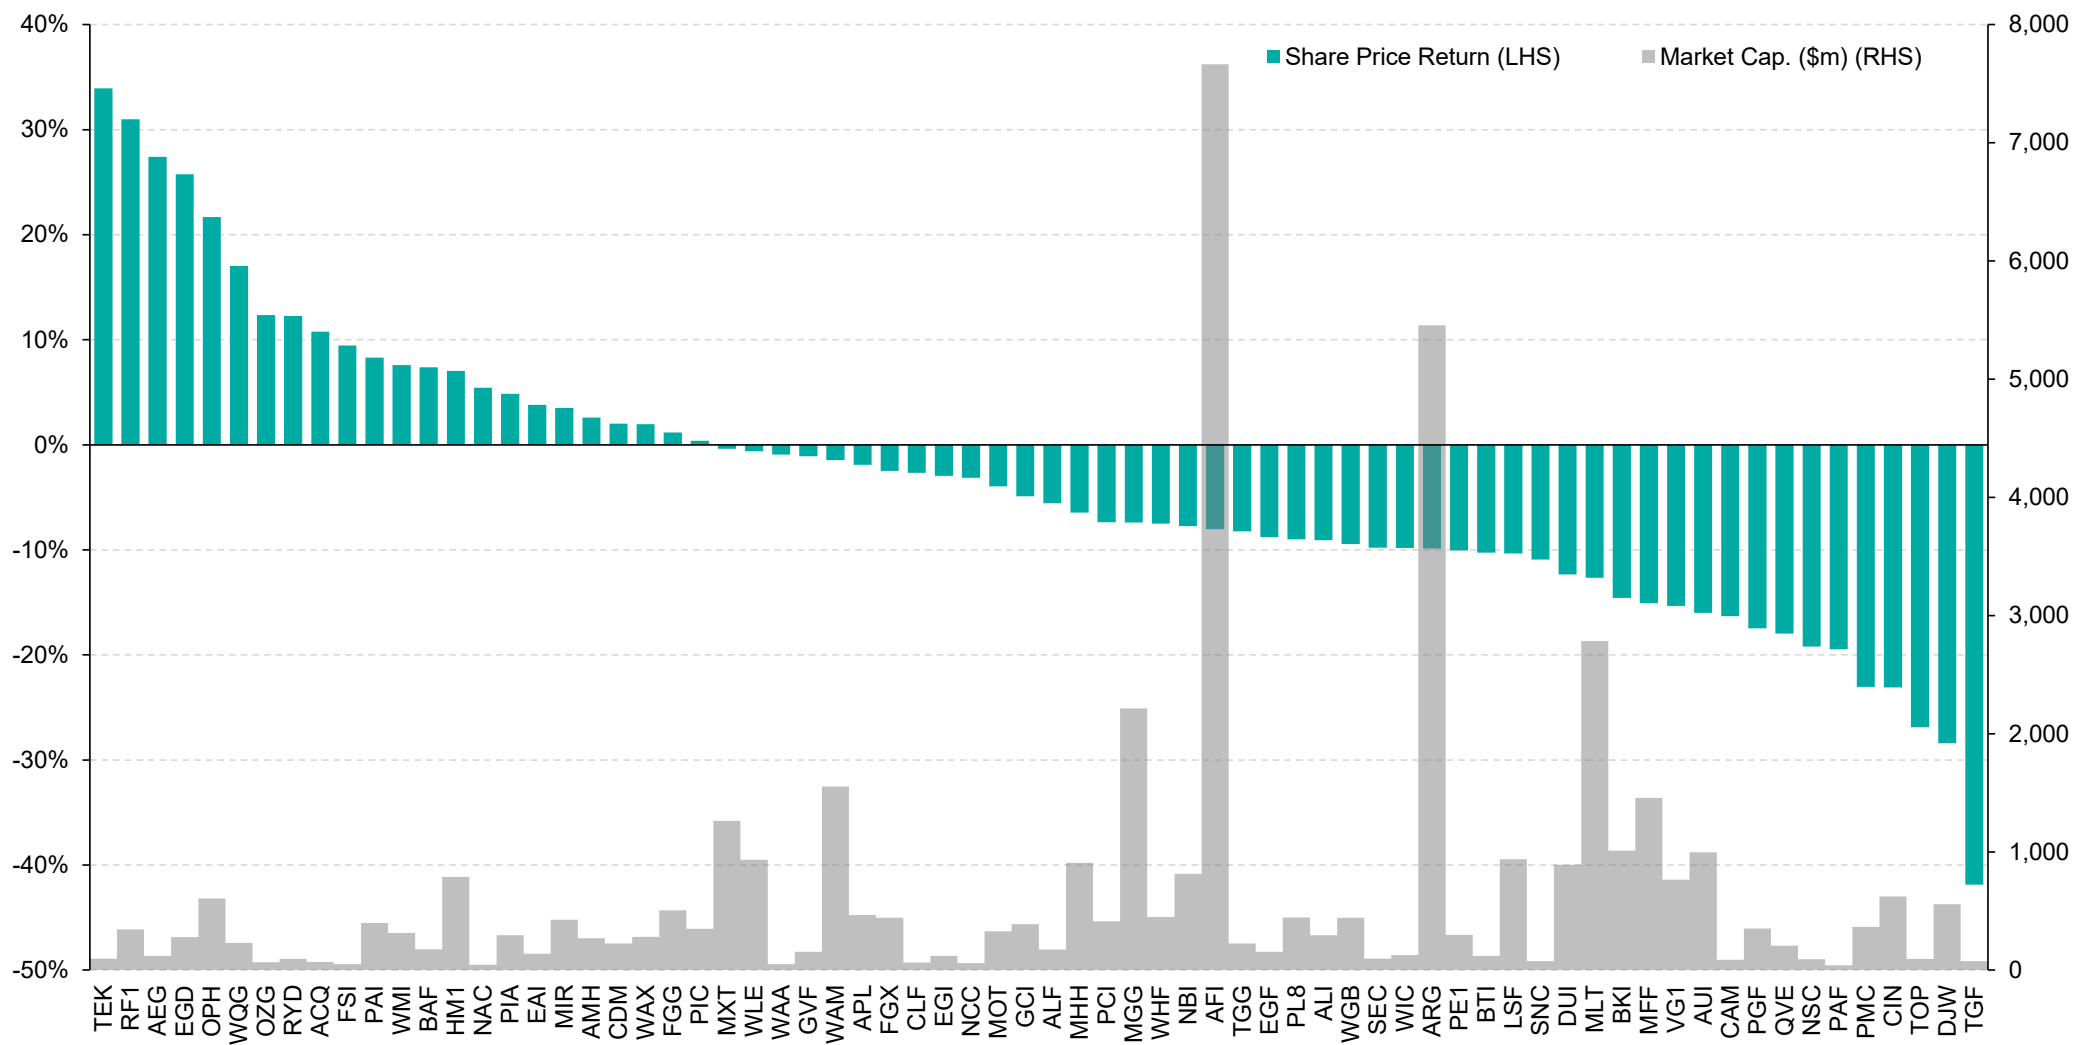

Source: IRESS, Company Data, Bell Potter Estimates

Chart 4: 5 Year Historical Premium/Discount Tracker by Market Capitalisation

Source: IRESS, Company Data, Bell Potter Estimates

Chart 5: Share Price Performance since 31 December 2019 (Including Net Dividends)
